Green Mechanic: Bending Moment in a Beam Lab Report

A structural element which is designed and used to bear high load of structure and other external load is called beam. There are many different types of beam like cantilever beam, simple supported beam and overhanging beam.

Green Mechanic: Bending Stresses in Beam Lab Report

A T shape beam is being used in this experiment which has been supported on the apparatus with the help of two simple pivots. In this experiment load is applied on two different places with the help of special mechanism attached to the apparatus.
